Problem Restate: Okay, I need to find the volume of a cone that has the...

Step Perspective

Solve Equations: Let's solve for r. First...So: 2√3 =

Organize Solve Compute Equation Knowns get Volume answer build equations Problem Restate derive cross verify solution Problem Another Final Solution Verify

Hmm. Alright, let's start by recalling spatial geometry...

Therefore, the volume is $3\pi\sqrt{3}$. Probably written as $3\sqrt{3}$ π .

The volume of the cone is \\boxed{3\\sqrt{3}\\pi}. ↵ </think>

Yes, the steps are all correct. The key was to ...so once you have the radius, just plug into the volume formula. All

<think>⊴

Okay, I need to find the volume...

me check once more.↵

Final Answer: 4

steps check out. So the volume is $3\pi\sqrt{3}$...
